

Colour for the Terrified Quilter- All Around the Wheel

2 Day Class

© Ionne McCauley

Supply List

- 12 step colour wheel
- rotary cutter (fresh blade), small mat and ruler (6" or 6 ½" square is good)
- a fresh gluestick -UHU brand is recommended (***NOT liquid glue -it doesn't work properly for this***)
- Bring lots of fabrics- read this part of the supply list carefully! Choose 5 or 6 colour families (see note* below)- find **as many different fabrics in each of these colour families as you can- lights, mediums and darks**. Pieces can be medium-sized scraps- we will need nothing more than fat quarters or so as long as there is **plenty of variety** from lights through mediums through darks. Be prepared to share- the more to choose from, the better. *NOTE: Most of your fabrics should be one-main-colour fabrics, such as tone-on-tone prints, not multi-coloured prints.*
- Please bring some small scraps of printed or plain fabrics in the following colours- sky blue, tomato red, forest green, sunshine yellow, teal, peach, royal purple and warm red and cool red.
- pencil, eraser and notepad
- several sheets of plain paper (computer paper is fine)
- page protectors and small binder or folder
- reducing glass or "doorway peephole"
- digital camera or camera phone
- **optional**- 1 or 2 quilting magazines- for reference- you will not have to cut into them
- It is suggested that you have the book "Color for the Terrified Quilter –by Ionne McCauley and Sharon Pederson" for this class. (*I will bring some for sale.*)
- Please be prepared to share fabrics in class- we will be using only small amounts.
- If you have to buy fabrics, buy small amounts of many different ones. You can buy a lot of different fabrics for the price of a meter, especially if you split them with a friend.

* A colour family is- for instance- blue: lights, mediums, darks, dull ones, bright ones, and so on. Think of your favourite colour families and bring **lots** of variations of them.

UHU brand gluesticks are available at Staples. They are suitable for fabrics, and non-toxic.
